Monterey Park, California 91754-2169

April 25, 2006

Mr. John Lim, President
GeoSpatial Technologies Inc.
3130 South Harbor Boulevard, Suite 430
Santa Ana, CA 92704

Dear Mr. Lim:

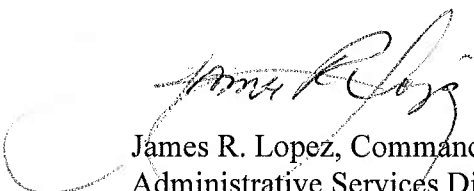

I want to thank you and the entire Geospatial Technologies Team for the collaborative successes you have made with the Los Angeles County Sheriff's Department. As the nation's largest Sheriff's Department, we are committed to working with the best companies, and GST has proven to be one of the best. In the past, GST has worked with our Crime Analysis Group in the area of Geocoding and Crime Mapping. This has been instrumental to us in understanding crime trends and how to deploy our deputies to optimize crime fighting efforts. GST also assisted our Department in putting GPS technology into our transportation buses. This has been a tremendous tool for the efficient utilization of our bus fleet for inmate transportation as well as increasing officer safety.

The current project, Smart Patrol Vehicles, is perhaps the most enterprising and exciting to date. When implemented, it will allow us to utilize GPS enabled handsets within a five county area, and allow a mobile command center in patrol vehicles to see 'sister vehicles' during high-risk Code 3 situations. Also, the Interoperability feature GST is incorporating for this project will meet the needs of our department and all surrounding agencies, thereby allowing us to ensure our communities with the highest level of public safety.

I look forward to continued success with Geospatial Technologies and the great team you have assembled.

Sincerely,

LEROY D. BACA, SHERIFF

James R. Lopez, Commander
Administrative Services Division
